Acme Mutual Insurance Company

REQUEST FOR PROPOSAL

Claims Platform Modernization and Application Support

RFP No. 2026-117

Issued by	Acme Mutual Insurance Company, Strategic Sourcing and Procurement
Address	One Acme Plaza, 200 Asylum Street, Hartford, CT 06103
Issue date	Monday, October 12, 2026
Proposal due	Friday, November 6, 2026, 3:00 PM Eastern Time
Submission	Acme Mutual Supplier Portal (sourcing event 2026-117)
Procurement contact	Dana Whitfield, Senior Sourcing Manager, IT Services
Contact email	dana.whitfield@acmemutual.example
Executive sponsor	Marcus Ortega, Senior Vice President and Chief Information Officer

1. Introduction and Purpose

Acme Mutual Insurance Company ("Acme Mutual" or "Acme") invites qualified suppliers to submit proposals for the modernization of its claims platform and for ongoing application support of the modernized platform. Acme intends to upgrade and migrate its on-premises Guidewire ClaimCenter 9 environment to Guidewire Cloud, running the current ClaimCenter release (Jasper or later), and to engage a single supplier to deliver the transition and then provide three (3) years of application support, with two optional one-year extensions.

This Request for Proposal ("RFP") describes Acme's current environment, the scope of services, Acme's requirements, the required proposal format, the evaluation approach and the commercial terms that will apply. Suppliers responding to this RFP are referred to as "Bidders".

Acme's objectives for this program are to:

- Retire the on-premises ClaimCenter 9 platform before the end of vendor support and move to a supported, cloud-delivered release cadence.
- Reduce average claim cycle time by at least 20% for personal auto and homeowners claims within 12 months of go-live.
- Reduce platform customizations by adopting base product capability wherever practical.
- Improve resilience and catastrophe (CAT) surge capacity.
- Establish a predictable, SLA-driven application support model with clear accountability.

2. About Acme Mutual

Founded in 1921 and headquartered in Hartford, Connecticut, Acme Mutual is a policyholder-owned property and casualty insurer writing approximately $4.1 billion in annual direct written premium. Acme writes personal auto, commercial auto and homeowners coverage in 18 states through a network of approximately 3,400 independent agents and a growing direct channel.

Acme's Claims organization employs approximately 2,100 staff across Hartford, Charlotte and Phoenix, supported by a panel of independent adjusting firms during catastrophe events. Acme handles approximately 410,000 new claims per year, with peaks of more than 9,000 first notices of loss (FNOL) per day during major weather events.

The program is sponsored by Marcus Ortega, Senior Vice President and Chief Information Officer, and by Acme's Chief Claims Officer. Day-to-day program leadership will be provided by Acme's Claims Technology group.

3. Current Environment

3.1 Claims platform

Acme has operated Guidewire ClaimCenter since 2016. The current production release is ClaimCenter 9.0, deployed on-premises across Acme's primary data center in Windsor, Connecticut and a secondary data center in Phoenix, Arizona, on an on-premises enterprise relational database cluster. Key characteristics of the current environment are summarized below.

Attribute	Current state
Product and release	Guidewire ClaimCenter 9.0, on-premises
Lines of business	Personal auto, commercial auto, homeowners
Named users	Approximately 2,600 (2,100 internal staff plus independent adjusters)
Peak concurrent users	Approximately 1,050
Customizations	Approximately 1,150 Gosu and configuration customizations

Attribute	Current state
Business rules	Approximately 220 assignment, segmentation and workplan rules
Claims history	Approximately 2.9 million claims (2019 to present), open and closed
Documents	Approximately 41 TB, stored in Acme's enterprise content management (ECM) platform
Support model	Mixed internal team and an incumbent supplier on time-and-materials terms

3.2 Integrations

The four priority integrations below are in scope for re-platforming. An additional 19 secondary interfaces (including vendor management, fraud scoring, medical bill review, rental and salvage) are in scope for rationalization.

System	Purpose	Current pattern
Duck Creek Policy	Policy administration; policy retrieval and coverage verification at FNOL	Synchronous web services through Acme's integration layer
Acme Payments Hub	Indemnity and expense payments by ACH, check and virtual card; reconciliation	Batch file plus message queue
Enterprise content management (ECM)	Document ingestion, retrieval, retention and legal hold	Point-to-point API
Acme FNOL portal (web and mobile)	Customer and agent first notice of loss	Custom API layer in front of ClaimCenter

3.3 Target state

Acme has contracted directly for a Guidewire Cloud subscription. The target state is ClaimCenter on Guidewire Cloud (Jasper release or later), hosted by Guidewire on AWS, integrated through Guidewire Cloud APIs and Integration Gateway with Acme's enterprise integration platform, which runs on Azure. Guidewire Cloud subscription and hosting fees are outside the scope of this RFP.

4. Scope of Services

4.1 Phase 1: Transition

The Transition Phase begins at contract start (targeted for February 1, 2027) and ends at hypercare exit. Acme's target go-live date is no later than April 30, 2028, followed by a 90-day hypercare period. The Transition Phase includes the following workstreams:

1. **Discovery and design.** Current-state assessment, customization rationalization, fit-gap against base product, target design and Design Authority sign-off.
2. **Upgrade and configuration.** Upgrade of ClaimCenter configuration and code to the current Guidewire Cloud release, adoption of base product capability, and Guidewire Cloud standards compliance.
3. **Integrations.** Re-platforming of the four priority integrations and disposition of the 19 secondary interfaces.
4. **Data migration.** Migration of seven (7) years of claims history, including financials, notes, activities, contacts and document references, with reconciliation to the general ledger.
5. **Testing and quality engineering.** Unit, system, integration, performance and regression testing, test automation, and support for Acme-led user acceptance testing.
6. **Cutover and hypercare.** Cutover planning and rehearsal, go-live execution, rollback readiness and 90 days of hypercare.
7. **Training and organizational change support.** Train-the-trainer materials and support for Acme's change management team.

The incumbent supplier will continue to support ClaimCenter 9 until go-live. Support of the legacy platform is not in scope.

4.2 Phase 2: Application support

Following hypercare exit, the selected Bidder will provide application support for the modernized platform for an initial term of three (3) years, with two optional one-year extensions at Acme's discretion. Services include:

- Level 2 and Level 3 incident and problem management for ClaimCenter configuration, integrations and data.
- Coordination with Guidewire for platform incidents and for the twice-yearly Guidewire Cloud release updates, including regression testing.
- An enhancement pool of 6,000 hours per year for minor enhancements and configuration changes.
- Monthly service reporting, quarterly business reviews and continuous improvement.

Level 1 service desk remains with Acme. The service levels that apply to Phase 2 are shown below.

Priority	Definition	Response	Restore	Coverage
P1	Claims processing or payments unavailable for multiple users; no workaround	1 hour	4 hours	24x7x365
P2	Major function degraded; workaround exists	2 hours	8 business hours	8 AM to 8 PM ET, Mon to Fri
P3	Minor function impaired; limited business impact	1 business day	5 business days	Business hours
P4	Service request or cosmetic defect	2 business days	Next scheduled release	Business hours

Service credits apply for missed P1 and P2 service levels as described in requirement CM-04.

5. Requirements

Each requirement is identified as **Mandatory (M)** or **Desirable (D)**. Proposals must state compliance with every requirement as Comply, Partially Comply or Does Not Comply, with a supporting explanation. A proposal that does not comply with any Mandatory requirement may be disqualified without further evaluation.

5.1 Functional requirements

ID	Requirement	M/D
FR-01	Upgrade ClaimCenter 9 to the current Guidewire Cloud release of ClaimCenter (Jasper or later) for personal auto, commercial auto and homeowners lines.	M
FR-02	Rationalize the approximately 1,150 existing customizations, retaining only those approved by Acme's Design Authority, with a target reduction of at least 40% through adoption of base product capability.	M
FR-03	Configure FNOL intake for web, mobile and agent channels, including straight-through assignment for low-complexity auto glass and towing claims.	D
FR-04	Implement Acme's assignment, segmentation and workplan rules (approximately 220 rules) and adjuster authority limits.	M
FR-05	Provide daily incremental claims data feeds to Acme's enterprise data platform for analytics and regulatory reporting.	D
FR-06	Support catastrophe surge operations, including onboarding of up to 500 temporary independent adjusters within 48 hours of a declared CAT event.	M
FR-07	Configure subrogation and salvage workflows, including recovery reserves and recovery tracking.	D
FR-08	Ensure reserving and payment functions comply with Acme's financial controls, including dual approval above authority limits and SOX key controls.	M
FR-09	Enable claimant status notifications by SMS and email through Acme's enterprise notification service.	D
FR-10	Provide role-based operational dashboards for adjusters, supervisors and claims leadership.	D

5.2 Technical, integration, data and testing requirements

ID	Requirement	M/D
TR-01	Integrate with Duck Creek Policy for policy retrieval and coverage verification at FNOL using Guidewire Cloud APIs and Integration Gateway.	M
TR-02	Integrate with Acme Payments Hub for indemnity and expense payments (ACH, check, virtual card) with end-to-end payment reconciliation.	M
TR-03	Integrate with Acme's ECM platform for document ingestion, retrieval and retention. Documents remain in ECM; only document references migrate.	M
TR-04	Re-point the Acme FNOL portal (web and mobile) to ClaimCenter Cloud APIs with no change to customer-facing URLs or user experience.	M
TR-05	Provide a documented disposition (retain, re-platform or retire) and implementation for each of the 19 secondary interfaces.	D
TR-06	Migrate seven (7) years of claims history (approximately 2.9 million open and closed claims), including financials, notes, activities, contacts and document references, with full financial reconciliation to the general ledger.	M
TR-07	Execute at least three full-volume mock conversions before cutover, each with documented reconciliation and Acme sign-off.	M
TR-08	Deliver a test strategy covering unit, system integration, performance (1,200 concurrent users at a 2-second 90th-percentile page response), regression and UAT support, with at least 85% automated regression coverage of critical business paths.	M

ID	Requirement	M/D
TR-09	Use Guidewire Cloud delivery pipelines and Acme's Azure-based integration platform for continuous integration and deployment of integration components.	D
TR-10	Provide a cutover plan with a maximum business outage of 36 hours over a weekend, including a rehearsed and tested rollback plan.	M

5.3 Security, privacy and compliance requirements

ID	Requirement	M/D
SR-01	Maintain a current SOC 2 Type II report (Security, Availability and Confidentiality criteria) covering all delivery centers used for this engagement, and provide the most recent report under NDA.	M
SR-02	Comply with the obligations of the New York Department of Financial Services Cybersecurity Regulation (23 NYCRR Part 500) applicable to third-party service providers, including multi-factor authentication, encryption in transit and at rest, and notification to Acme of any cybersecurity event affecting Acme within 24 hours.	M
SR-03	Keep production claims data and nonpublic personal information (NPI) in US data centers. Offshore personnel may access only masked or synthetic data, except through an Acme-approved virtual desktop with session recording.	M
SR-04	Complete background screening (criminal, education, employment and sanctions) for all personnel before they are granted access to Acme systems or data.	M
SR-05	Hold ISO/IEC 27001 certification for all delivery centers used for this engagement.	D
SR-06	Support Acme's annual third-party risk assessment and right to audit, and remediate penetration test findings within defined timelines (critical: 15 days; high: 30 days).	M
SR-07	Use Acme's enterprise single sign-on (SAML 2.0 or OIDC) and privileged access management for all access to Acme systems; shared accounts are prohibited.	M
SR-08	Provide documented data masking for all non-production environments, with verification evidence for each refresh.	D

5.4 Staffing and delivery requirements

ID	Requirement	M/D
ST-01	Name an Engagement Director, Delivery Lead and Solution Architect, each with at least two prior Guidewire ClaimCenter cloud implementations. Key personnel may not be replaced during the first 12 months without Acme's written consent.	M
ST-02	Be a Guidewire-certified implementation partner with at least 25 consultants holding current Guidewire ClaimCenter certifications at the time of proposal submission.	M
ST-03	Provide at least three client references for ClaimCenter implementations or upgrades at US property and casualty insurers within the past five years, at least one of which is a migration to Guidewire Cloud.	M
ST-04	Provide on-site presence at Acme's Hartford office: core leadership on site at least two days per week during design and at least four days per week during cutover.	D
ST-05	Provide a knowledge transfer plan that enables Acme's internal team to assume configuration-level changes by the end of Year 2 of support.	D
ST-06	Provide 24x7x365 support coverage for P1 incidents and business-hours coverage (8 AM to 8 PM ET, Monday to Friday) for P2 to P4.	M
ST-07	Retain at least 50% of Transition Phase team members in the Phase 2 support team to preserve continuity.	D

5.5 Commercial requirements

ID	Requirement	M/D
CM-01	Price the Transition Phase as a fixed price, with milestone payments tied to deliverable acceptance and a 10% holdback released at hypercare exit.	M
CM-02	Price Phase 2 as (a) a managed-services fixed monthly fee with defined ticket volume bands, or (b) time and materials against the rate card with an annual not-to-exceed amount. Bidders may offer both.	M
CM-03	Hold rates firm for Years 1 and 2 of Phase 2; annual increases thereafter are capped at the lesser of 3% or the change in CPI-U.	M
CM-04	Accept service credits of up to 12% of monthly Phase 2 fees for missed P1 and P2 service levels.	M
CM-05	Accept Acme's Master Services Agreement (MSA). All exceptions must be listed in the proposal; material exceptions to limitation of liability or data protection terms may result in disqualification.	M
CM-06	Maintain professional and technology errors and omissions insurance of at least $10 million and cyber liability insurance of at least $25 million per claim.	M
CM-07	Propose a productivity or gain-share commitment for Phase 2, such as a year-over-year reduction in ticket volume or support cost.	D

6. Proposal Submission Format

Proposals must be submitted through the Acme Mutual Supplier Portal as a single searchable PDF for the technical proposal, a separate PDF for the price proposal, and the compliance matrix in Excel format. The technical proposal is limited to 60 pages, excluding resumes, references and required forms. The following sections are mandatory and must appear in the order shown.

No.	Section	Required content
1	Cover letter	Signed by an officer authorized to bind the Bidder; acknowledgment of all addenda issued
2	Executive summary	Maximum three pages; understanding of Acme's objectives and summary of the proposed solution
3	Compliance matrix	Response to every requirement in Section 5 and in any addendum (Comply, Partially Comply, Does Not Comply) with explanation
4	Solution approach	Approach for each Transition workstream, including customization rationalization and data migration
5	Delivery plan and timeline	Integrated plan to go-live and hypercare exit, milestones, dependencies and key risks
6	Team and delivery model	Organization chart, key personnel, delivery locations and resourcing plan; resumes in an appendix
7	Application support model	Phase 2 operating model, SLAs, reporting, knowledge transfer and continuous improvement
8	Security and compliance	SOC 2 Type II summary, NYDFS 23 NYCRR 500 approach, data protection and access controls
9	References	Three client references meeting requirement ST-03, with contact details
10	Price proposal	Submitted separately in the format described in Section 9
11	Exceptions	All exceptions to the RFP or MSA, with proposed alternative language
12	Required forms	Conflict of interest disclosure, certificates of insurance and signed confidentiality acknowledgment

7. Evaluation Criteria

Acme will first confirm that each proposal is complete and complies with all Mandatory requirements. Proposals that pass this gate will be scored against the weighted criteria below. Acme may invite the highest-scoring Bidders to oral presentations and may request best and final offers.

Criterion	Weight	Considerations
Solution and technical approach	30%	Quality and realism of approach, customization reduction, migration and testing strategy
Price and total cost of ownership	25%	Transition fixed price plus three years of support; value of commercial commitments
Delivery model, team and key personnel	15%	Experience of named personnel, delivery locations, continuity and governance
Relevant experience and references	15%	ClaimCenter cloud migrations at comparable US P&C insurers
Security, risk and compliance	10%	SOC 2, NYDFS 500, data residency and risk management approach

Criterion	Weight	Considerations
Innovation and value-adds	5%	Accelerators, automation and productivity commitments

8. Timeline

All times are Eastern Time. Acme may change any date by addendum posted to the Acme Mutual Supplier Portal.

Milestone	Date
RFP issued	Monday, October 12, 2026
Virtual pre-proposal conference	Tuesday, October 13, 2026, 10:00 AM
Intent to bid due	Monday, October 19, 2026
Final bidder questions due	Friday, October 23, 2026, 5:00 PM
Final answers posted	Friday, October 30, 2026
Proposals due	Friday, November 6, 2026, 3:00 PM
Shortlist notification	Friday, November 20, 2026
Oral presentations	December 1 to 3, 2026
Best and final offers due	Friday, December 11, 2026
Intent to award	Friday, December 18, 2026
Contract start (target)	Monday, February 1, 2027

9. Pricing Format

All prices must be in US dollars, exclusive of applicable taxes, and valid for 180 days from the proposal due date. Travel expenses must be included in the prices; Acme will not reimburse travel separately.

Schedule A: Transition Phase (fixed price). Provide a fixed price for the Transition Phase broken down by the payment milestones below. A 10% holdback applies to each milestone payment and is released at hypercare exit.

Milestone	Description	Price (USD)
M1	Mobilization and discovery complete	
M2	Design Authority sign-off	
M3	Build complete (configuration and integrations)	
M4	System integration test exit	
M5	UAT exit and mock conversion 3 sign-off	
M6	Go-live	
M7	Hypercare exit (holdback release)	

Schedule B: Phase 2 application support. Provide pricing for one or both options. Option 1: a fixed monthly managed-services fee for each year of the initial term, assuming a volume band of 450 to 650 tickets per month, with the unit price for tickets above the band. Option 2: time and materials against Schedule C, with an annual not-to-exceed amount. In either option, price the 6,000-hour annual enhancement pool separately at a blended hourly rate.

Schedule C: Rate card. Provide hourly rates by role and delivery location (onshore, nearshore and offshore) for use in change requests and Option 2, together with the assumed blended rate and location mix.

10. General Terms and Conditions

1. **Governing agreement.** The selected Bidder will be required to execute Acme's Master Services Agreement and a Statement of Work for each phase. The MSA is available on the Supplier Portal.
2. **Addenda.** Acme may amend this RFP at any time by addendum posted to the Acme Mutual Supplier Portal. Bidders are responsible for monitoring the portal and must acknowledge every addendum in their cover letter. Acme is not responsible for a Bidder's failure to obtain addenda.
3. **Communications.** From issue of this RFP until award, all communications must be directed to the procurement contact named on the cover page. Contact with other Acme employees, directors or agents about this RFP may result in disqualification.
4. **Questions.** Questions must be submitted through the portal messaging function. Acme will publish questions and answers to all Bidders without attribution. Answers do not modify the RFP unless incorporated by addendum.
5. **Costs.** Bidders bear all costs of preparing and submitting proposals and of participating in oral presentations.
6. **No obligation.** This RFP does not commit Acme to award a contract. Acme may reject any or all proposals, award all or part of the scope, or cancel this RFP.
7. **Confidentiality.** This RFP and all related information are confidential and may be used only to prepare a proposal. Proposals become the property of Acme.
8. **Conflicts of interest.** Bidders must disclose any actual or potential conflict of interest, including relationships with Acme employees.
9. **Publicity.** Bidders may not make any public announcement concerning this RFP or any resulting award without Acme's prior written consent.
10. **Governing law.** This RFP and any resulting agreement are governed by the laws of the State of Connecticut.

Acme Mutual appreciates your interest and looks forward to your proposal.

Dana Whitfield
