Questions and Answers Log No. 01

RFP	No. 2026-117, Claims Platform Modernization and Application Support
Date posted	Tuesday, October 13, 2026
Source	Virtual pre-proposal conference (October 13, 2026) and portal messages received to date
Contact	Dana Whitfield, Senior Sourcing Manager, IT Services

Questions are reproduced as submitted, without attribution. In accordance with RFP Section 10, item 4, answers in this log do not modify the RFP unless incorporated by addendum. Bidders should also review Addendum No. 01, posted on the same date.

Q1. Is support of the existing ClaimCenter 9 environment during the Transition Phase in scope?

No. The incumbent supplier will continue to support ClaimCenter 9 until go-live. The selected Bidder will be expected to work cooperatively with the incumbent during knowledge transfer and cutover.

Q2. Can Acme provide data volumes for the migration?

Approximate volumes for claims opened from January 1, 2019 to date are: 2.9 million claims, 6.4 million exposures, 38 million notes, 71 million financial transactions and 14 million document references. Document content (approximately 41 TB) remains in the ECM platform and is not migrated. Volumes grow by approximately 410,000 claims per year.

Q3. Is offshore delivery permitted?

Yes, subject to requirement SR-03 (production data and NPI remain in the US; offshore access only to masked or synthetic data, or through an Acme-approved virtual desktop with session recording). Please also see Addendum No. 01, which adds requirement ST-08 on the delivery model.

Q4. Has Acme already contracted for Guidewire Cloud, and which environments will be available?

Yes. Acme has contracted directly with Guidewire for the Guidewire Cloud subscription. Subscription and hosting fees are outside the scope of this RFP. Guidewire will provision development, two test, pre-production and production environments. Bidders should state any additional environments they assume.

Q5. Will Acme accept a managed-services price only, without a time-and-materials option?

Yes. Requirement CM-02 requires at least one of the two options. Acme encourages Bidders to price both options to support evaluation of total cost of ownership.

Q6. Does the P1 four-hour restore service level apply to outages of the Guidewire-hosted platform?

No. For outages of the Guidewire Cloud platform itself, the Bidder is responsible for incident management, communication and coordination with Guidewire, and the response service level applies. The restore service level applies to Bidder-supported components, including configuration, integrations and data fixes.

Q7. Is the $25 million cyber liability insurance requirement negotiable?

Requirement CM-06 remains Mandatory. Acme will accept a combination of primary and excess cyber liability coverage that totals at least $25 million per claim. A certificate of insurance must be provided before contract signature.

Q8. What are current support ticket volumes?

Over the last 12 months, Level 2 and Level 3 ticket volume averaged 541 tickets per month: P1, 3; P2, 38; P3, 260; P4, 240. Volumes during catastrophe months were up to 35% higher.

Q9. May Bidders use AI tools in delivery?

Yes, within the security requirements of the RFP. Acme data must not be entered into public AI services or used to train third-party models. Please see Addendum No. 01, which adds requirement TR-11 on AI-assisted testing.

Q10. Do resumes count toward the 60-page limit?

No. Resumes, references and required forms are excluded from the page limit (RFP Section 6).
